Pain and Misery
by Marty Robbins

```
C
Well when I come home this morning was still too dark to see
                        C7
I could tell that baby wasn't sleepin' next to me
             F                                C
She's gone and left me where to I guess I'll never know
             G7                                C
I only know her leavin's brought pain and misery to my soul

Well a note was on the pillow she's gone without a doubt
                          C7
I tried to read her writin' but I couldn't make it out
             F                                C
The tears were fallin' too fast for me to even read
             G7                    C
Nobody knows my sorrow nobody knows my misery

My friends told me she'd leave me but I said they wasn't right
                                  C7
She'd give no word of warnin' she'd be leavin' in the night
          F                                  C
Can't understand her what made my baby want to go
               G7                                C
I didn't hear her leavin' she didn't even close the door

Well if she come home this mornin' I'd jump and shout with glee
                                    C7
She can't mean more to someone else than what she means to me
           F                                 C
I love that woman I got to have her all the time
               G7                                C
I got to have her near me to ease this misery on my mind
```
