Please Come Back With My Heart-Norma Jean

```
G                         G7    C
Please come back with my heart without it I can't start
   G                              D7
To put this lonely feeling to an end
    G                        G7       C
Yes I know you're gone for good but darling if you could
           D7                                  G
Please come back with my heart so I can love again

                                          D7
When you left I told you everything was yours
                               G
Take anything you want I don't mind
                    G7     C
But now that you're gone I know that I was wrong
             D7                             G
You took one thing you should have left behind
```

Repeat #1

```
                            G7       C
Yes I know you're gone for good but darling if you could
           D7                                  G
Please come back with my heart so I can love again
```
