Please Leave My Darling Alone-Jim Reeves
[3/4 time]

```
C               G7      C
Please leave my darling alone
          F                 C
She's the only love I have known
   F                    C
Go find someone else I want her for myself
                    G7      C
So please leave my darling alone

               G7          C
Down deep she wants to be true
           F                                C
But like a child with a toy bright and new
    F                              C
The fascination is there and she might learn to care
                      G7          C
Then she'd trade the old for the new

                    G7      C
So please leave my darling alone
F                            C
Without her I just can't go on
        F            C
She was never untrue until she met you
                    G7      C
Now please leave my darling alone
```
