Prisoners Song-Sonny James
Author:Guy Massey

```
G                          C
Now if I had wings like an angel
   D7                          G
Over these prison walls I would fly
                             C
And I'd fly to the arms of my darling
   D7                       G
And there I'd be willing to die

                            C
Now I wish I had someone to love me
   D7                   G
Someone to call me their own
                            C
Oh I wish I had someone to live with
      D7                   G
'Cause I'm tired of living alone

                                  C
In my mind I have a grand ship on the ocean
   D7                       G
All mounted with silver and gold
                                 C
And before my poor darling would suffer
    D7                         G
That ship would be anchored and sold

                                C
I'll be carried to the new jail tomorrow
 D7                         G
Leaving my poor darling all alone
                               C
With the cold prison bars all around me
   D7                      G
And my head on a pillow of stone
```
