Rain Please Go Away-Dan Tyminski
Author:Del McCoury

```
G
Rain please go away
                          C
Leave me alone come another day
         G                C
My love is gone this time to stay
D7             G
Rain please go away

It's tough to live the whole day through
                         C
Thinking of her is all I do
          G               C
She's happy now and I'm so blue
D7                    G
Rain she's cold like you

If only the time wouldn't drag so slow
                         C
Find a new love and let it grow
             G                          C
I'm kidding myself it don't happen that way
D7               G
Rain please go away

Rain please go away
                          C
Leave me alone come another day
          G               C
My love is gone this time to stay
D7             G
Rain please go away
```
