Reaching-Wanda Jackson

```
G                 G7       C            G
Oh how I'd love to touch the one I love so much
                                        D7
I'll reach and I'll keep reaching patiently
G                 G7       C             G
Passion rules your heart now pride keeps us apart
                       D7             G
It hurts but I'll keep reaching desperately

                  G7     C                G
My arms are open wide although I know you lied
                                       D7
I'm jealous but that you'll never see
G               G7          C              G
Please tell her today you're coming home to stay
                        D7            G
I'll wait but I'll keep reaching desperately

                          G7      C                 G
There's something in the air that tells me you still care
                                                 D7
Though pride and passion took you on this spree
G                         G7         C                G
When you're through with her then my arms say welcome in
                        D7            G
I'll wait but I'll keep reaching desperately

                  G7     C                G
My arms are open wide although I know you lied
                                       D7
I'm jealous but that you'll never see
G               G7          C              G
Please tell her today you're coming home to stay
                        D7            G
I'll wait but I'll keep reaching desperately
