Real Good Woman-Jean Shepard
Author:Johnny Mosby and Jonie Mosby

```
G                                              G7
There oughta be a law against your runnin' around
    C                 G
And leavin' me home at night

I tried everything that I know how
   A7                 D7
To get you to treat me right

G
Why in the world did you marry me
  G7               C
I just don't understand
                  G
How you expect a real good woman
   D7                 G
To stay with a no good man

                                     G7
You know I love you with all of my heart
    C                          G
And that's the way it should be

But you're spreadin' good will all around town
     A7                   D7
That rightfully belongs to me

G
You want me to honor our marriage vows
    G7           C
But on the other hand
                 G
How you expect a real good woman
   D7                 G
To stay with a no good man

     C
Well every Friday when you get paid
  G
I have to telephone to hunt you down
C
All the bartenders know my voice
         G               D7
And they say you're not around

        G
You can take all of yours so called friends
    G7               C
And keep 'em if you can
                  G
But you can't keep a real good woman
   D7              G
By bein' a no good man

Repeat #4,5

C                   G
No you can't keep a real good woman
   D7              G
By bein' a no good man
```
