Reason To Be-Don Williams

```
C           F      G7             C
First I was loved  then I came to be
        F      G7        C
I had a heart  inside of me
              F      G7            C
And though my heart  was working I found
                F          G7         C
Still there was something  it had not found

          G7    F         C
So I went away  hoping to see
F         C     G7                C
Maybe I'd find  what's missing in me
           G7    F                C
Knowing so well  but not knowing why
     F      C         G7            C
If I didn't find this something I'd die

           G7    F               C
And then I came  to where I have been
F          C      G7                C
I knew the first  was still not the end
           G7    F              C
What I had left  was not what I found
  F               C   G7              C
Because there was you because there I found

            F      G7             C
First I was loved  then I came to be
        F      G7        C
I had a heart  inside of me
              F      G7               C
And though my heart  is still part of me
            F      G7            C
You give my heart  its reason to be
```
