Rhythm In My Baby's Walk-Johnny Horton

```
C
I've traveled across this country been in every town
                                        C7
I looked through those catalogs until I finally found
  F
A girl with a study eye the kind that really talks
  G7                                                          C
I haven't time to make a rhyme of the rhythm that's in my baby's walk

I've been from California back through Tennessee
                                       C7
I've searched on nooks and corners you suit me to a tee
    F
The way you carry your little head the little slang you talk
  G7                                                          C
I haven't time to make a rhyme of the rhythm that's in my baby's walk

    F                            C
The twinkle in your pretty eyes thrills me through and through
F                              D7            G7
I had to take a second look to see if it was true

   C
My roaming days are over I know I'll settle down
                                      C7
In some secluded rendezvous away out way from town
    F
The love-light tells the answer her eyes began to talk
  G7                                                          C
I haven't time to make a rhyme of the rhythm that's in my baby's walk
```

Repeat #2,3,4
