Second Choice-Stonewall Jackson
Author:Wayne P. Walker and Irene Stanton

```
G                                  C
I'm always second choice I'm never first with you
  D7                               G
Oh how it hurts to see you out with someone new
                                            C
But I'll wait around while you play around and have your fun
     D7                                                  G
Maybe someday you'll make second choice your one and only one

                                   C
Just when I think I'm number one I find I'm number two
 D7                              G
I feel the pain and hide the hurt that I go through
                                          C
I live on dreams my precious dreams that never will come true
   D7                                                 G
How long will I be second choice and love you like I do

                                         C
Though second choice is hard to take I'll never change sweetheart
   D7                              G
I'll always be around to play the loser's part
                                        C
I'll swallow pride and lock inside the heartaches that I feel
   D7                                          G
How long will I be second choice with the love so real
```

Repeat #1
