Suffer In Silence-Willie Nelson
[3/4 time]

```
C G7                          C
I think I should speak to you stranger
G7                           C
Your problem is clear now to me
    G7                            C
You think that the whole world's against you
    G7                           C
And you tell everyone that you see

A7                      D7
Just suffer in silence speak no bitter words
G7                        C E7
The world offers no sympathy
       C                             F
Though trouble surrounds you and you long to be heard
G7                           C
Just suffer in silence like me

     G7                     C
I'll give you a lesson in living
G7                           C
And I hope it stays with you awhile
       G7                    C
You're the reason for all of your sorrows
   G7                         C
So just suffer in silence and smile
```
