**Sugar Cane Moon-Bob Wills**
**Author:Bob Wills and Cindy Walker**

```
C                                          D7
When it's sugarcane time along around about June
                    G7                          C
I'll be walking with sugar neath that old sugar moon
                                  D7
Gonna drop her a line to expect me soon
                    G7                        C
Oh I'm craving some sugar neath the old sugar moon

I can see her right now she'll get the calendar down
                D7                          G7
Scratch a circle around the day we're altar bound
                    C                       D7
When it's sugarcane time long around about June
                     G7                           C
Wedding bells will be chiming neath the old sugar moon

                                       D7
When the sugar moon shines along about June
                    G7                          C
I'll be walking with sugar neath that old sugar moon
                                          D7
All the kisses I missed I'll be getting ‘em soon
                   G7                        C
Sugar kisses from sugar neath that old sugar moon

                                                  D7
I'm dreaming sweet dreams of all the loving I'll get
                D7                  G7
I get back to my pet lordy how I'll fret
                    C                       D7
Till it's sugarcane time long around about June
                    G7                          C
I'll be walking with sugar neath that old sugar moon
