Sweet Baby Mine-Isla Grant

```
G                   C                        G
There's a sweet memory  that I keep in my mind
                 D7                  G    G7
And sometimes I drift  way back in time
                 C                                G
To the day I first held you  and kissed your sweet face
                  D7                    G     G7
Now theses precious memories  time can't erase

           C                     G
Sweet baby mine  where have you gone
                 D7                  G   G7
Now when I look at you  well I see a man
                       C                          G
And you've grown proud and tall with the passing of time
            D7                                   G    G7
Still in my heart you'll always be sweet baby mine

                 C                                 G
You may travel the world  search for fortune and fame
                       D7
Don't give up till you've made your mark
                     G    G7
And everyone knows your name
                 C                               G
But remember when you are gone  many miles far away
                    D7                           G    G7
That the love in your mother's heart  always will stay

Repeat #2,1,2

G           D7                                  G
Still in my heart you'll always be sweet baby mine
```
