Sweetheart You Done Me Wrong-Doyle Lawson
Author:Bill Monroe and Lester Flatt

```
C                               F
You told me that your love was true
            G7                     C
Sweetheart I thought the world of you
                F
Now you left me all alone
          G7             C
I have no one to call my own

                             F
Now sweetheart you done me wrong
         G7            C
You have left me all alone
                        F
Maybe there will come a time
               G7                    C
Sweetheart when you will change your mind

                          F
I never shall forget the day
         G7                    C
When you said you were going away
                                F
I couldn't believe that it was true
             G7                C
After all the love I had for you
```

Repeat #2

```
                            F
The road is rough and rocky too
           G7               C
As I travel on dear without you
                          F
I'm still praying for the time
               G7                    C
Sweetheart when you will change your mind
```

Repeat #2
