Take Me Back-Heidi Hauge

```
G                                    C
Take me back to that little peaceful valley
       G                                      D7
Let me ramble down those country roads and then
       G                                       C
Let me sit out on the porch with friends and family
        G          D7              G
Take me back to my childhood home again

     D7                                        G
I've traveled and I've seen this wide world over
       D7                                    G
Traded less for riches fancy friends and fame
         D7                                 G
But it's fine of all I gain I still got nothing
   A7                                    D7
Compared with what I had in childhood days

Repeat #1

        D7                                    G
Fifteen years have come and gone still I remember
    D7                                  G
The last words that I heard my daddy say
        D7                                  G
This old world is crazier now more than ever
        A7                                          D7
But this valley's always home if you lose your way

Repeat #1

C       G          D7             G
Take me back to my childhood home again
```
