Tennessee-Carl Perkins

```
C                                                        D7
Now there are folks who like to brag about where they came from
    G7                                    C
But when they start that stuff I let 'em be
                                     D7
But it makes me feel like I wanna brag some
   G7                                        C
To know that I come from the state of Tennessee

                                      G7
Let's give old Tennessee credit for music
                                       C
As they play it up in Nashville everyday
                                      F
Let's give old Tennessee credit for music
        G7                              C
As they play it in that old Hillbilly way

                            D7
Mister Red Foley came from Kentucky
           G7                              C
Now Ernest Tubb down in Texas don't you see
                                     D7
But if all you folks out there can remember
       G7                            C
Mister Eddy Arnold came from Tennessee

repeat #2

                                                    D7
They make bombs they say that can blow up our world dear
       G7                            C
Well a country boy like me I will agree
                                      D7
But if all you folks out there will remember
     G7                                    C
They made the first atomic bomb in Tennessee

repeat #2  x2
```
