The Image of Me-Jim Reeves
Author:Harlan Howard and Wayne Kemp

```
G                    C             G
Does he kiss you like I used to kiss you
       C            D7        G
Does he hold you like I used to do
       C            D7               C      G
Does he dine you and wine you does his kiss remind you
A7                           D7
Of me when our love was still new

G                    C                G
Does he love you like I've always loved you
     C           D7        G
Is he worried like I used to be
         C           D7           C          G
Would you take him and break him and finally forsake him
            D7           G
And make him the image of me

      C        D7               C
Has he reach the point where he'll walk the floor
     G         D7          G
And waits for you to come home
     C          D7       C      G
Does he ever get blue like I used to
A7                          D7
How does he feel when you're gone

G                    C               G
Will he miss you like I've always miss you
       C           D7               G
Will he long for the things that can't be
     C            D7         C        G
Will love leave an ember he'll always remember
                 D7           G
Well then he's the image of me
```

Repeat last verse
