The Last Look At Mother-Hank Locklin

```
G                                C                   G
Of all the tragic scenes in life there's one I can't forget
    C                  G          A7              D7
The memory of a little girl still lingers with me yet
    G                                C                  G
The sad remarks I heard her say we're more than I could stand
C                    G        D7                    G
While she stood sadly pleading holding her daddy's hand

                      C       G
Let me have another look at mother
                                              D7
Daddy please oh let me have just one more look
    G                                C                  G
Her little heart was breaking through tears oh how she sighed
C                    G             D7                 G
For one last look at mother please daddy please she cried

                                     C             G
She didn't seem to understand why mother had to leave
    C                    G               A7            D7
Her blinding tears were falling oh how my heart did grieve
    G                                    C             G
Her little friends were standing by their hearts in sad despair#
C                        G        D7                     G
Each time she called to mommy oh please don't leave me here

                                      C                  G
Her daddy slowly picked her up and whispered words to her
    C              G               A7             D7
The sorrow he was hiding was more than he could bear
    G                                   C                 G
She held him tightly in her arms these words I heard her say
C                  G             D7                   G
Oh daddy we will miss her will she come back some day

                      C       G
Let me have a another look at mother
                                              D7
Daddy please oh let me have just one more look
    G                                C                  G
Her little heart was breaking through tears oh how she cried
C                    G             D7                 G
For one last look at mother when they closed her inside
```
