Walk With Me-Eddy Arnold
Author:Don Robertson

```
C                                F          G7
Walk with me put your faith in love and walk with me
                                       C     G7
You're the one my heart has waited for
C                                F          G7
Trust in me leave your tears behind and trust in me
                                       C     F
I'll be here by your side forever more

C            F                       C
True as the stars that shine up above
               Am                      D7 G7
That's how we stay we'll find our love
C                               F        G7
Heaven's doors just a step away so darling please
                                        C
Put your hand in mine and walk with me
```
