Walls Can Fall-George Jones
Author:Frank Dycus, Billy Yates, Bruce Bouton

```
C           F         C     F             C
I once stood in the darkness I couldn't see a light
         F          C      G7
Backed up against the wall I built around my life
C     F      C          F         C
I'd run out of reasons to ever love again
               F      C       G7              C
But somehow you found a door and you came waltzing in

         F              C
Walls can fall storms can end
                        G7
Sky's can clear hearts can mend
C     F                           C            F
All it took was your sweet love to rise above it all
       C        F         C       G7        C
You can build 'em strong and tall but walls can fall

       F    C            F               C
Here we stand together with stones enough to build
          F      C    G7
A bridge into forever beyond the highest hill
   C        F     C            F             C
The past will fade behind us if we let the future shine
               F     C             G7            C
Not a thing can come between us if we always keep in mind

Repeat #2
                 F         C       G7        C
You can build 'em strong and tall but walls can fall
```
