Warmth of the Wine-Johnny Bush
Author:Larry Kingston

```
C             Em          F          G7
I'll open the bottle that closes the past
C               Em     F           G7
Just filling up top by draining my glass
C               Em          F          G7
She's out of my life but she's still on my mind
C                  Am           G7           C
So I'm chilling her memory in the warmth of the wine

                Em             F          G7
The taste is so bitter but the glow is so sweet
C             Em          F         G7
The man she dismantled is once more complete
C             Em          F            G7
The pieces of my life she scattered so fine
C               Am             G7           C
Once more fused together in the warmth of the wine

    G7                        F           C
The warmth of the wine is my soul saving fire
G7                            F          C
Without it I'd freeze in the storm of desire
                 Am           F          G7
But with it I'll make it and I feel so fine
   F                          G7
My cold glass of love is the warmth of the wine

C                 Em            F           G7
For some it's too early but for me it's too late
C                Em             F      G7
The wine sets me free but won't let me escape
C                   Em             F           G7
So I'll sit here each night till they turn out the sign
C          Am          G7            C
Out of the cold in the warmth of the wine

           Am          G7            C
Out of the cold in the warmth of the wine
```
