**Wasted Love-Hank Snow**

```
C                    F              C
You said goodbye and left me broken hearted
          G7                              C
You little knew the pain 'twould cause to me
                                  F                C
Those days we shared sweetheart can never be forgotten
           G7                       C
Twas Wasted Love but sweet the memory

       G7                 C
Wasted Love and dreams of you
         G7               C
A broken heart and oh so blue
  F                       C
I gave my all you gave me heartaches
           G7                       C
Twas Wasted Love but sweet the memory

                        F                 C
I should have known it from the start my darling
           G7                       C
But love is blind and so I did not see
                    F               C
I freely gave you my only heart and soul dear
           G7                       C
Twas Wasted Love but sweet the memory

                       F                      C
I thought some day my dreams would all come true dear
         G7                            C
We'd be together as in the used to be
                    F              C
But it's too late my every hope forgotten
           G7                       C
Twas Wasted Love but sweet the memory
```
