We'll Never Say Goodbye-Hank Snow
Author:Harry McAuliffe

```
G                                          C
Lift your head and dry your tears  for our parting time is near
      D7                                   G
Just a kiss to cheer our hearts before we're gone
                                        C
Well you know it's hard to say  but it has to be that way
     D7                               G
We'll never say goodbye just say so long

     C                         G
We'll never say goodbye little darling
   A7                                D7
And I hope you say the same when I have gone
    G                                  C
Just one more kiss and let me hold your hand dear
     D7                               G
We'll never say goodbye just say so long

                                   C
I remember times when tots  like two kids we were full of thoughts
  D7                                  G
To join our hands so young we knew 'twas wrong
                                   C
Now that years have passed away I regret those words to say
     D7                               G
We'll never say goodbye just say so long
```
