We've Got A Good Fire Goin'-Don Williams
Author:Dave Loggins

```
C                                              F      G7       C
There's a storm rolling over the hill and the willow tree's a blowin'
    F             C               Am     F        G7
I'm standing here staring out the window safe and warm
  C                                           F    G7          C
I feel her put her arms around me and it's a good feeling I'm knowin'
        F                            G7              C
Oh I've got a good woman and we've got a good fire goin'

                                           F    G7        C
We've got a feast on the supper table and br-ead for breakin'
  F               C           Am                    F
A blessin' to the Lord for making me such a fortunate man
    C                                    F    G7   C
The light of my life in the candle her face a glowin'
        F                            G7              C
Oh I've got a good woman and we've got a good fire goin'

                                        G7
So let it rain (let the rain fall down) let it rain
   F        C           Am             F
It won't do nothin' but kindle a never ending flame
G7           C                G7                    Am
Let it rain (let the rain fall down) let it rain till mornin'
        F                            G7              C
Oh I've got a good woman and we've got a good fire goin'

                                                F         G7           C
Now there's a hard rain fallin' on the roof coffee coming from the kitchen
    F          C                Am              F           G7
I'm lyin' here listening to the ceiling and the living room floor
  C                               F    G7     C
I feel her lay down beside me my love is overflowin'
        F                            G7              C
Oh I've got a good woman and we've got a good fire goin'

Repeat #3

        F                            G7              C
Oh I've got a good woman and we've got a good fire goin'
```
