Yellow Moon-Don Williams
Author:Richard Brannan

```
C   F                      C
The moon is on the rise it stares at me tonight
      F             G7                C
I'm reminded of the arms that held me tight
F                      C             Am
Last time I held you it ended all to soon
        F          G7             C
We were lying underneath a yellow moon

                  Am                F
There's a yellow moon hanging in a starry sky
C                                  G7
Oh I wonder if you're watching it too
C                 Am                F
There's a yellow moon hanging in a starry sky
C             F   G7                 Am
Wherever you are it's watching over you
   F        G7              C
Oh shine on shine on yellow moon

F                          C
Sometimes we sit and talk me and that old moon
          F             G7           C
I ask him are you happy or if you're blue
F                          C                 Am
I start to reminisce to a summers night in June
            F    G7              C
We fell in love under a yellow moon
