Yesterday's Gone-Vern Gosdin

```
C               F         C
Once upon a time there was tomorrow
            F      C      F           G7
But that was yes-terday and yesterday's gone
                  C     F           C
The dreams that we shared have all been forgotten
                        G7           C
For they were yesterday's and yesterday's gone

                       F               C
You once wore my name and stood here beside me
            F      C      F           G7
But that was yes-terday and yesterday's gone
                  C        F           C
You gave me your heart and loved me so sweetly
                       G7             C
But that was yesterday and yesterday's gone

     F              Gm                C
I can see now where I took your love for granted
          G7                          C
I can see now all the times I loved you wrong
           F                         C
I thought I knew the things in life I wanted
                       G7             C
But that was yesterday and yesterday's gone
    G7          C
And yesterday's gone
    G7          C
And yesterday's gone
```
