You're Everything I Want-Bill Anderson

```
C
Youwalked in with an attitude
F                           A
bit little sex and little bit rude
C                                G7
Long on beauty short on nothing at all
C
You looked so hot and you played it so cool
F
I shoulda known better but I'm a fool
C                           G7                C
You shot me a glance and you got me climbing the wall
F                                            C
You're everything I want and not a thing I need
                            G7                      C
You gotta a bad idea written across the rear of your jeans
F                                                   C
I'd run like the devil if I knew what was good for me
                            G7           C
You're everything I want and not a thing I need

You gotta a body that just won't quit
F
And a good looking face to go with it
 C                                          G7
I can't even dance for falling all over the floor
C
But I see nothing but trouble in you
F
The kind I'd like to get into
C                             G7               C
But if I hang around here it's clear what I'm in for

Repeat
#2
