You Don't Move Me Anymore-Johnny Horton

```
C                              G7      C
Well I say you don't move me baby anymore
                                     G7
I know you don't move me baby anymore
    C
You run around in circles like a bugged eye bat
    F
I'm gonna show you baby who's a cool cool catch
    C             G7      C
You don't move me baby anymore

                            G7                C
You're not the same sweet chick you used to be
                                     G7
To make it plain you don't appeal to me
      C
Cause every time I tell you I love you so
    F
You just snap you fingers and say go cat go
    C             G7      C
You don't move me baby anymore

                G7            C
Well I won't be lovey dovey anymore
                                    G7
Cause I ain't your sweet daddy anymore
  C
I used to shake and rattle at your command
     F
Well you can roll your biscuits for another man
    C             G7      C
You don't move me baby anymore

                               G7                 C
I'll tell all your king toad friends I'm on the loose
                                     G7
And tell 'em all I'm out to cook your goose
  C
I tried to play it cool and you strung me along
    F
I'm gonna show you I can sing a cool cat song
    C             G7      C
You don't move me baby anymore
```
