You Wanna Give Me A Lift-Loretta Lynn

```
G
Well I'm game for just about anything
                                        D7
But the game you've named I ain't a gonna play
    G                                                   C
You say you take a little drink and we'll go for a ride on a star
         G                          D7                  G
You wanna give me a lift but this ole gal ain't a going that far

That happy pill you're taking you say is a little weak
                                                  D7
And you wanna give me one so you say I won't go to sleep
     G                                                          C
Well your hands're a getting friendly but I know exactly where they are
         G                          D7                  G
You wanna give me a lift but this ole gal ain't a going that far

    C                                                   G
You wanna give me a lift but this ole gal ain't a going that far
    C                   A7                  D7
I'm a little bit warm but that don't mean I'm on fire
    G                                               C
You wanna take me for a ride in the back seat of your car
         G                          D7                  G
You wanna give me a lift but this ole gal ain't a going that far

Repeat #3

                                    D7                  G
You wanna give me a lift but this ole gal ain't a going that far
```
