You Want Her Not Me-Kitty Wells
Author:Jim Anglin

```
C                   F             C
Your touch tells me all I need to know
                                G7
I lost you it hurt to see you go
       C                                F
Yes I'm unhappy but at least my heart's free
      C             G7      C
I'm no fool you want her not me

        F                        C
You want her not me the truth I know
                                        G7
Though you're not man enough to tell me so
          C                           F
Our love's nothing more than a memory
              C             G7      C
Since I found out you want her not me

                     F                        C
I knew something was wrong your kisses grew cold
                                      G7
When you found new love my love was old
      C                                   F
Oh you stare into space your eyes don't see
               C              G7      C
The whole town knows you want her not me
```
