Your Heart Turned Left-George Jones
Author:Harlan Howard

```
C                                       F
Your heart turned left and I was on the right
    G7                                  C
You couldn't have hurt me more with dynamite
                                F
Thought I was your destiny but just before you got to me
     G7                                 C
Your heart turned left and I was on the right

                              F
I almost had the battle won what could I have said and done
     G7                               C
That put you in another's arms tonight
                               F
I don't know where I lost out I just know without a doubt
     G7                                 C
Your heart turned left and I was on the right
```

Repeat #1

```
                                            F
Now my poor heart just moans and groans I walked around just kicking stones
   G7                              C
Oh cupid sure won't get another bite
                             F
Honey why'd you lead me on without a warning you were gone
     G7                                 C
Your heart turned left and I was on the right
```

Repeat #1

```
          G7                                  C
Yeah your heart turned left and I was on the right
```
