Your Locket Is My Broken Heart-Hank snow

```
G                                   C
When you left I closed your little locket
      D7                            G
And I sealed fast it with blinding tears
                                     C
Nothing in this whole wide world can break it
           D7                              G
Though I've held it up for all to see for years

     B7                              C
Many hands have reached out for it's tiny golden chain
     A7                                D7
Many lips have been tried but cried in vain
        G                            C
For our love I've sealed within your locket
         D7                   G
And your locket is my broken heart

                                  C
All the love we knew and shared together
        D7                        G
All the joy we knew right from the start
                                   C
I have saved and guarded it in your locket
       D7                          G
So the locket's nothing but a broken heart

         B7                        C
For that treasure of mine there is but a single key
       A7                               D7
It's a love that you used to share with me
        G                            C
For our love I've sealed within your locket
         D7                   G
And your locket is my broken heart
