Your Mother's Eyes-Mel Tillis
[3/4 time]

```
C                              G7              C
My children come sit here and hold to daddy's hands
                                    D7           G7
For I must tell you something that I don't understand
F                                C             F
Lately we've been living in the shadows of surprise
      C                     G7               C
Since I'm not the only man in your mother's eyes

                               G7               C
I can't say it's my fault and I won't say it's hers
                                 D7                  G7
Cause I might have neglected when her need for me occurred
F                              C       F
But we're still a family and must realize
     C                      G7               C
That I'm not the only man in your mother's eyes

F              G7          F           C
No I'm not the only man in her eyes anymore
    D7                     G7
And soon she'll be leaving walking out the door

    C                     G7            C
And things won't be easy with her not around
                                 D7                    G7
And the shame that's now with us will be hard to live down
F                             C                  F
So children bear with me promise daddy you'll try
      C                       G7               C
Since I'm not the only man in your mother's eyes
                              G7               F  C
Since I'm not the only man in your mother's e-yes
```
