Your Uncharted Mind-Gene Watson
Author:Mel Holt

```
C
I wish I had the combination
   F                          C
To open up the secrets in your mind

To get a reading on your thoughts
        F
Takes a chart that I have searched for
          C
But can't find

     G7                         C
So I rely on basic instinct to take me
                        F
Where I think I need to go
      G7
Why I wonder in the first place
                                 C
How we ever got together I don't know

                  F        C
How can the blind lead the blind
           F           C
I wish you would be so kind
      F
As to help me find a way for us
     C            G7
That I alone can't find

Oh there has to be some answers
                             C
Somewhere in your uncharted mind

In our private times together
        F                                C
I have wondered how well you think I'd do

Have I climbed to the mountain top
        F                                  C
Have I ever really reached up there with you

     G7
Your beauty on the outside
C                                  F
Suffers from the chill that's deep within
         G7
And it's for that very reason
                                 C
I go back to basic instinct once again

Repeat #3

         G7
Oh there has to be some answers
                             F   C
Somewhere in your uncharted m-ind
```
