Your Used To Be-Brenda Lee
Author:Jack Keller and Howard Greenfield

```
D7           G                    D7
Your used to be that's me that's me
           C                D7                G
I was your was she is your is it's plain to see
                          C
I'm not your now oh pity me
           G     D7           G
For I've become  your used to be

Every time you kiss me
                 C
It tastes just like goodbye
           G                    Em
And I can tell that my best friend's
            A7
The reason why

D7                G
When we're out together
                  C
You say there's nothing wrong
                      G              Em
But when she's with us you're with her
        A7     D7   G
And I'm just a tag along

Repeat #1

When I introduced you
           C
I made my first mistake
             G                 Em
I loved you both and both of you
               A7
Made my heart break

D7         G
Like musketeers
           C
We always roamed about
               G              Em
But like they say three's a crowd
        A7      D7      G
And I'm getting crowded out

Repeat #1

                D7           G
Oh I've become your used to be
```
